

How-to Set Up a Free Yahoo
-mail Account continued

E

- Make-up a password and answer a few questions that will help Yahoo identify you if you ever forget your password. You should choose a password that is easy for you to remember but not easy enough for someone else to guess what it is. A password consisting of letters and numbers is best. Please note that your password is case sensitive.

My Yahoo 'Password' is:

-
- When all 'blanks' that have an asterisk (*) next to them have been filled in, click 'Do you Agree'. If the ID you chose is available, you will get confirmation of your new e-mail address. If the ID has all ready been taken, Yahoo will give you suggestions of ID's that have not been taken. Choose one of the suggestions or try to make one up again.
 - Click on 'Create My Account.'

How-to Set Up a Free Yahoo E-mail Account

- Double click on the blue 'Internet Explorer' icon on your desktop. You are taken to North Suburban Library's home page:
www.northsuburbanlibrary.org
- Type **www.yahoo.com** into the address bar and then press 'Enter'.
- When the Yahoo web site comes up, click the 'Mail' icon at the right of the page. You now have the option of logging into your e-mail account or setting up a new e-mail account.
- Click on 'Sign Up'.
- Fill in your first and last name and gender. Be sure to keep 'Yahoo! U.S. in English' selected.
- Create your 'Yahoo! ID'. This 'ID' will make up the first half of your e-mail address. Usually, people choose some combined form of their name— like the first initial of their first name combined with their last name. For example, 'Charles Doe' might choose an ID of *cdoe* or *charlesd*. Numbers may also be used. This ID must be unique to Yahoo. Because it is free, many ID's have all ready been registered. It may take a few tries to find an available ID. Please note that your ID is case sensitive.
